

1. Existing as drawn in granted scheme (1:125)

3. Existing as surveyed 01.12.2025 (1:125)

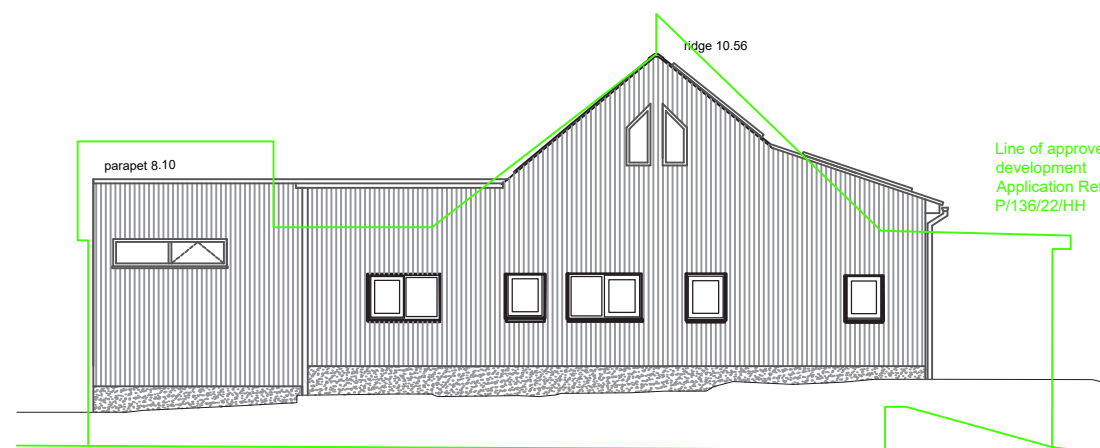

Key (NTS)

2. Proposal as drawn in granted scheme (1:125)

No levels on the proposal. But the granted scheme increases the ridge height and introduces extensions that look bolted in - not coherent or considered.

4. New application to be submitted as Removal/Variation of Condition application (1:125)

Our proposal retains the existing ridge height and consolidates the overall building mass which respecting what currently exists on the site. Most importantly, allowing the clients to reveal and restore the train carriages internally.

Our proposed elevation also reduces the size of windows and shows the new external cladding and insulation to make the house more thermally efficient.
