Simon,

As I thought, the gauge within the Harbour (near to the Rife outfall) is an EA one and they have no intention to remove or decommission it.

The data is NOT publicly available but it can be readily accessed by those with access permissions (within the EA).

On this basis, I do not see any reason to not discharge this particular Condition (#14).

Regards,

Roger

Simon,

I don't think we need concern ourselves with whose tide gauge it is, providing it is suitable and operational and likely to remain so; also, that we can readily get to the data.

I assume that it is an EA gauge – I will check and get back to you.

Regards,

Roger

Roger, Karl

Please see NE comments FYI.

Can you confirm re condition 14 that there is a tidal gauge in place which is monitoring tidal height & flow. Please also note Angela's notes at points 1) & 4) under Condition 5 where she states that there will be a requirement for checking of the existing situation by ADC Engineers.

Kind Regards
