Dear David,

With regard to this planning application, I have been looking at the Noise Assessment. Could you let me know what class use the Osborne Refrigeration site has? And also whether there are any restrictions on the use on this site (times etc.)? This is because the assessment has been done based on what is on site at present, not the worst case scenario.

Further, the noise report suggests as mitigation a 4 metre acoustic fence. Would the Planning Department be happy with a fence of such a height?

Thanks

Fiona
