RECEIVED

Dear Sir or Madame,

I am writing
regarding the planning application
for Pagham Road, application P/140/
16/OUT Pagham Road

My family have lived in Pagham
since 1915 (approx), and the changes
we have seen have not been for
the better.

The village is bigger than it
should be now, the doctor's
surgery can't cope with the am-
ount of patients and the hospital's
are already struggling. Building
another surgery is not the answer
as enough doctor's for the existing

Surgery cannot be found, so all you would have is an empty building. The same applies for schools, a lack of spaces and a lack of teachers.

The roads can't cope with the traffic now, if there is a problem on the Bognor to Chichester Road all traffic is on the Pagham Road and vice versa, causing immense delays for people trying to get to work.

As well as the above obvious reasons, I cannot see the sense of building more properties on Good rains, especially as it seems we live in a village destined to be left to go under water as it is.

The wading birds rely on the fields by that side of the harbour at high tide, we are in danger of having a

nature reserve with no nature.

I have lost both my parents in recent years, and I am glad they are not here to see the further decimation of our home.

I have no doubt the decision has already been made, but I do hope someone will at least take the time to read all the letters sent in.

Bit by bit the reason for us living here is being taken away, there is little resemblance to the village it was anymore, and it seem's things will only get worse.

Yours Sincerely
