22/2/17

Dear Sir or Madam,

We wish to object to the above planning applications on the following grounds.

① Development on this vast scale will forever change the area & not for the better. Some still view Pagham as a village but with a development this size it will just become part of the ever growing urban sprawl of Bognor & the character of the area is lost forever.

② We will be losing prime farmland in the area, needed to feed the country's ever growing population once built on these fields are lost forever. During the 2nd World War all available land was used for the growing of food no matter how tiny, we can never say that these circumstances may^{not} apply again in a world as unstable as our own. Also the wildlife habitats are destroyed forever and the animals just end up being killed on the roads whilst they forage for food in an ever decreasing area.

③ The infrastructure is not there to sustain these

proposed developments. The hospitals and the drs are at breaking point, if they are unable to cope now, the future looks very bleak when at least 2000 more people come to live in pagham. It is all very well to say that a new surgery will be built but where are the GP's coming from, when more & more are retiring from the profession and due to the on going pressures less & less new drs want to become GP's. Also with a proposed development of this size the

Local Schools would not be able to cope and again if a new primary & Secondary School was built, there is a nationwide shortage of teachers so it would be very hard to staff, and local education would suffer as a result. The roads would also be horrendous to drive on, pagham road already gets congested during the rush hour & with an extra 1000+ cars it would indeed become the road to hell. The pollution would be awful & it would affect many more people healthwise.

Which again puts a strain
on local services like the
hospitals & drs. The whole
of the South East is a
population dense region &
yet more & more housing is
being proposed & the
beautys of the area will
be lost forever under the
ever encroaching concrete
& tarmac. What a wonderful
legacy for future
generations! Without green
open spaces peoples well-
being is affected and all
too often mental illness &
physical illness result. There
are many more reasons we

Could raise as to why these developments should not go ahead but we are sure that these will be voiced many times over by those who object to these schemes. We are both happy for this letter to be seen by all sides in the debate over this issue.

Yours faithfully,
