Dear Assistant Director

On behave of the West Meads Residents Association

I wish to register our abjection to the above Planning Applications

1. West Meads and Aldwick have suffered more than enough due to the site 6 (North Bersted) development with **colossal growth in traffic** since it started and is increasing all the time as more houses are built on site 6 and as site 6 is not yet finished will only get worse. This is having a big impact on our daily lives.

2. If these proposed developments should go ahead the increased traffic will be intolerable for us residents of Aldwick and Pagham - let alone the pressure that will be put on the local infrastructure, Doctors, Dentists, Schools and St. Richards Hospital

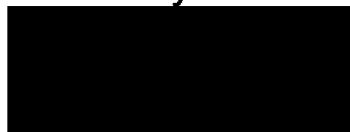

3 Please tell me where are all these new residents going to work ?? in Bognor or Pagham ?? no they will have to travel from Pagham along the **ONE** well over used road into and out of Pagham or through Rose Green and Aldwick then queue on the A259 until they get to the A27 where they will queue again going East or West.

No something **has to be done** with the roads around Pagham, Aldwick and Bognor Regis **before** any additional building takes place.

4 The above is bad enough without mentioning the lose of good and very productive farmland that we rely on for **our food** as well as the **jobs** these farms create.

On these grounds we ask these applications be rejected.

Yours sincerely

Chairman
West Meads Residents Association
