14th October 2018

Dear Mr Crowther,

Application No:- P/134/16 OUT; P/140/16/OUT

With regards to the above planning applications please could you tell me what provision, if any , has been made for the increase in traffic on B2166 and adjoining roads. Will any work be done on these roads before building begins? Who will be responsible for road repairs?

Has anyone looked at state of B2166 currently or driven this road at busy times? It is obvious that it is not fit for purpose at present so how will that be resolved with increased traffic?

What provision is being made for cyclists? You have to be brave to venture along the B2166 and Pagham road at present (even though they are designated cycle routes) how much worse will they be with 4000-6000 cars from new development plus attendant services/construction vehicles.

Will the bus companies be providing extra buses as currently there is a lack of provision at busy times?

West Sussex County Council insist that Arun District Council are responsible for upgrading facilities for local developments so I hope that this will be foremot in your mind at the meeting on 24th October 2018.

Yours sincerely,

Morag Close
