Dear All

I note that the HRA Final Report 19/9/18 16/32 – B is dated 19/9/18 but this was replaced by an amended HRA Final Report dated 18/10/18

The last Natural England Consultation response reported to the DCC is dated 18/10/18 but it refers to a Consultation undertaken by ADC on 24 September 2018 and refers to and is based on the HRA Report dated September 2018. Therefore NE as the relevant statutory consultee has not been consulted on the Final HRA Report dated 18/10/18. I also note that the additional Brent Goose mitigation condition (published just 1.5 days before the Committee itself and after any interested party could comment on same) does not follow the advice given by NE and the wording has also not been considered by them. Can I therefore suggest that you consult NE on the most up to date Final HRA so that they can consider and confirm their advice in the light of same and the wording of the condition proposed by ADC officers and that you provide the DCC with the opportunity to reconsider the matter in the light of these material considerations before issuing a decision

Please place this e mail on the file for future reference if required

Thanks

Paul Collins BA (Hons) DipTP MRTPI
