

This architectural elevation drawing shows a symmetrical three-story building facade. The central section features a red brick chimney and a gabled roof. The side sections have white siding and gabled roofs. The ground floor is finished with brown brick. The drawing includes decorative elements like stone quoins and greenery.

This architectural elevation drawing shows a two-story building with a complex roofline. The roof is finished with red brick and features a central gable and a smaller gable on the left side. The left portion of the building has a stone masonry facade, while the right portion is finished with red brick. The stone section includes a white dormer window, a small arched window, and several rectangular windows, some with decorative lintels. The brick section has a series of rectangular windows on both floors. A central entrance with a small overhang is located on the ground floor. The drawing includes landscaping elements like trees and shrubs to provide context.

An architectural elevation drawing of a two-story house. The house features a red brick roof and a large white gable end with black trim. The main body of the house is constructed of red brick, while the gable end is white. There are several windows, some with black frames and others with white frames. A small balcony with a black railing is visible on the second floor. The house is surrounded by trees and shrubs, including a large green tree on the left and a smaller tree with orange leaves in the center. The background is a light gray sky.

A horizontal number line representing distance in feet. The line starts at 0 and ends at 30. Major tick marks are labeled every 5 feet: 0, 5ft, 10ft, 15ft, 20ft, 25ft, 30ft. Above the line, there are five points labeled 1m, 2m, 3m, 4m, and 5m. These points correspond to the 3ft, 6ft, 9ft, 12ft, and 15ft marks on the number line.
