Subject: P/167/25/RES

Land South of Summer Lane Pagham.

I have reviewed this application with regards to ecology.

Lighting

The proposed lighting avoids illuminating the trees and has a level of 1 Lux off the road. The temperature is 4000K. Could the lighting conform with the recommendations of the Institution of Lighting Professionals (ILP) "Guidance Notes for the Reduction of Obtrusive Light" (GN01:2011) and. "Bats and Artificial Lighting at Night" (GN08 2023

The recommended lighting specification shall use LED's with the recommended spectrum being 80% amber and 20% white (The recommended Kelvin level is 2700) with a clear view, no UV a horizontal light spread of less than 70 degrees.

Landscaping

The proposed landscaping is acceptable.

The inclusion of Briza media in the planting scheme for the swales is probably not required as the proposed Wetland Meadow Mix Emorsgate EM8, contains seven species of grass.

Regards,

Jonathan Best MCIEEM
