Thank you for your internet representation made on 16th February 2022 which has been recorded as an objection with the comments as follows:

OWPC44435

I hope the planning committee consider all the recent revelations concerning Southern Water, whose drainage network uses combined sewage effluent and rainwater drainage. Its release of untreated sewage into inland watercourses supposedly at times of heavy rainfall has been questioned. The Committee should consider the cumulative effects of all developments in the Pagham area with much of the rural land into which rain could soak now being covered with houses, becoming effectively impermeable and causing run off to go down the drain. Insisting that future developments install dual drainage would lay the foundations for a pollution free system but until that occurs we must be mindful of the future impacts of overdevelopment which will overwhelm a system. The Pagham Waste Water Treatment Works is one of those which is currently nearing capacity and is not fit for purpose.

Your views as made above will be considered before the application is determined.
