15th September 2019

Dear Mr. Brouther,

Re: P/30/19/OUT - Land North of Hook Lane - Agham

Thank you for your letter of the 2nd September re the above matter.

I presume you may have been made aware of my concern in this matter after I wrote to Mr Nick Gibb M.P., so I am enclosing a copy of this letter. I need add very little to this as it is self-explanatory. As it is impossible to get an appointment at our surgery within a reasonable time, I have now given up using it, and take my wife direct to A+E at Chichester.

Not difficult to imagine what the situation will be like when several thousand more people from these newly constructed houses attempt to sign is it?

While the Council may gleefully rub their hands together at the prospect of receiving another 300 dollars of Council Tax to swell their coffers, all the occupants will be clamouring to sign on for doctors, NHS dentists and schools. Most of these houses would have one, two or even three cars to join the grid-locked roads which already exist!

You have effectively destroyed a once-pleasant one in which to live. I hope you are proud of yourself!

Yours sincerely

C O P Y

12th August 2019

Dear Mr. Gibb,

I was astounded to learn recently of the decision to allow the construction of hundreds of houses in the Hook Lane area, despite the unbearable burden this would impose on schools, doctors surgeries and roads.

I recently set off to visit my daughter's house in Chichester, from Rose Green, and $1\frac{3}{4}$ hours later I finally arrived at the end of this 4 mile journey having encountered total gridlock on the Pagham Road.

My wife suffered what could have been a serious heart problem. But found it virtually impossible to get an urgent appointment at Grove House surgery in anything less than a week.

Not difficult to imagine the pollution that was created by hundreds of cars gridlocked on my journey to Chichester is it?

During the recent local elections, for the first time in my 83 years, I voted Lib/Dem as they were the only party who undertook to oppose the construction of these houses, but it sadly seem to make little difference.

The decision to allow the construction of these houses can be summed up in two words - utter lunacy!

Yours sincerely,
