Dear Mr Davis

I have attached photos regarding my objection towards this application. Once large and tall caravans were in place it would be even clearer during the summer months how obtrusive these vans were. Obviously in winter with no leaves on the bushes there would be no hiding them anywhere.

Red = proposed site

Green = pedestrian cut through to farm road

Yellow = 50 meters from first residents property

Blue = local residents (off photo at top more residential housing just as close)

Below shows the pedestrian cur through to our road.

Having discovered that there is permitted development for caravans already in place for ten months of the year, I feel I need to clarify my previous complaint, to ensure my protest is about the positioning of these vans for 12 months of the year. It is hoped that if this proposal is refused, and the vans would have to be moved annually that a less offensive position or a different site all together is found for these caravans/seasonal workers where it won't be causing an issue to local residents and public.

I believe having looked at the planning application that the applicant has misled the Arun Planning Department. These vans will be seen from the public foot path and undoubtedly lights will be seen at night from the main road. I have taken photos which I will attach in a separate email which shows the natural screening. As you can see there are big gaps at this moment. From Autumn until Spring, this natural foliage disappears with the leaves. I walk this footpath most days and I can assure you that you see through this

hedging most of the way down. This means we will be viewing 31 caravans and the mess created permanently. It might be worth taking a look at other sites to see what they look like.

They are also misleading you by saying these 186 workers will all be working on this site and yet this Roundstones Newey site is incredibly automated and is certainly not employing them all here, therefore it will obviously be used as a bank of workers for the surrounding nurseries. Thus all my points raised about the infrastructure and road are valid.

It should not be up to us to prove after the permission has been granted that they all work on site and are not being bussed or making there own way to other nurseries. Roundstones should have to prove that this is the case and prove it on a regular basis.

Our irritation that the sign you put up over a week ago was removed and then replaced on Thursday is enormous. It shows underhand tactics are being used. Which seems to fit in with the new ethos of this and other countries. Everyone thinks they can do what they want and bully and deceive others to get what will financially gain them at the cost of all those surrounding.

We request that you have a site visit and come and see us. It would be good to have a meeting for all the residents.

I look forward to hearing from you.

Abi Hudlass
