Env Health Comments

[REDACTED]

Dear Simon,

In relation to the above application, I understand from the plan provided that every property will have access to either an active or a passive EV charging point. I assume that plots 35 and 36 are passive points but I would appreciate the developer confirming this, please. Based on this assumption and the aforementioned plan, it appears that of the 90 properties, it is proposed that 29 will have active points installed and 61 will have passive points installed. Before this condition can be fully considered, please may the developer confirm how many of the 90 properties have a garage/driveway and how many have a parking space?

Many thanks,

Kate.
