Hi Simon,

I hope you had a good weekend.

In total there are 29 plots with garages which each have an active EV point and the remaining 61 plots with spaces have passive EV points.

Regards

Peter Drury
Technical Manager

Dear Peter,

I agree that there is an error in the SPD but as I have said, our Group Head of Planning is requesting that we determine on the basis of what the SPD should say.

It may be that we can make an 'on balance' decision but I need to be clear on the facts before I discuss with those above. Can you advise:

- the total number of garages on the site
- the total number of driveway spaces (i.e. spaces leading to a garage or otherwise alongside the wall of the dwelling to which they belong – so excluding any instances of 2 spaces in the middle of a block of 6 spaces)
- the total number of other remote or unallocated/visitor spaces
- the total number of active points provided on the plan (green dots)
- the total number of passive points shown on the plan (orange dots)

I have just tried to count these but I am doing so by looking at the plan on a laptop screen and keep losing my place/forgetting where I am up to when moving around the plan. If you have the paper plan there or otherwise a schedule, it could be easier for you to provide.

Kind Regards
