

APPLICATION NO:

P/40/20/DOC

I can confirm that the written scheme of investigation for an archaeological evaluation is satisfactory and that it may therefore be formally agreed. The requirement of condition 30 will thus have been fulfilled and it may be discharged.

I can also confirm that I consider the written scheme of investigation for the recording of the pillbox outlines a suitable preliminary to the formulation of an appropriate programme for its retention and interpretation, and that condition 34 may be partially discharged.
