10th July 2013.

Reference Planning Application P/51/13.

For 9, Shirley Close, Pagham.

Dear Mrs Chapman,

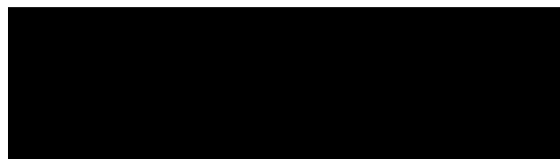

Since my last letter regarding the above planning application, I have been reminded that both the waste water from our kitchen, and the waste and sewerage matter from our bathroom are interconnected with the drains/sewer on the above property at 9, Shirley Close.

Because of serious disabling health issues we have a specially adapted bathroom, so it is essential that probable building work relating to any new drainage systems do not interfere in any way with the free flow of any discharge of water/effluence from our kitchen or bathroom.

May I assume that such matters as the layout of any new drainage requirements that may be required by extensions, are automatically studied and considered by yourselves, so that no interference in the use of the existing drains/sewers is caused to neighbours.

I raise this point as the plumbing arrangements required following the alterations shown on the above application are so different from the existing layout.

Yours sincerely,

D. F. Salter.
