Dear Sirs

I am writing to you about the above planning application, has any one from your department looked at the entrance road not only is to narrow for large dust carts etc there is no where for people with prams etc to walk to the homes plus passing cars, there will be two entrances next to each other going into a very busy road with a busy bus stop opposite where the buses have to hold up the traffic because of so many cars parked on both sides of the road now so it is an accident waiting to happen does no one care about the wild life as it seems that if there is a little grass it has to built on where will all the rain water go but to flood our gardens we used to have loads of rabbits and a bird of prey but since the new houses were built on the other side off the paddock they have disappeared please think of the people living in Pagham many of them elderly These houses will spoil the little green space that is left I live in a park home and these houses will be directly behind my fence which will be a fire hazard with people having fires in they garden and fire works etc

Your faithfully
