

Planning number P/58/19/PL

ARUN DISTRICT COUNCIL TECHNICAL SUPPORT
07 AUG 2019
ACTION...

19 Millfarm Drive,

West Sussex, PO21 3UE

I OBJECT to this planning,

The planners say that they are going to put in a Red/Green light system for the use of the Inglenook car park plus new homes, this proves already, is a dangerous pathway. With cars at the moment that Park in car park, the people going into the hotel walk into the garden at the back then into the hotel, now the New home owners, Men, Women, Children, older people, some with mobility scooters, will need to use the pathway with cars, bikes, delivery vans, very large refuse lorries, with no actual pavement.

Where are their brains in their bank accounts?

Let's forget looking at the area on a weekday when there's a quite day, come back when Weddings are on, Conferences, the very popular Sunday Carvery, it will be chaos there will be cars with a Red light against them waiting to go in with cars waiting north and south on Pagham road, at the moment local people see cars parking on double yellow lines, some on the pavement near the phone box. To the planners, it might not be your day of working Saturday or Sundays but put in some sensible over time and come back. As the owners say the paddock was used as an over spill car park, so there you go, once built on where are the extra cars going?

Mrs B Hicks.
