Hi Leon,

Thanks for sending over the revised information. Could you provide an exceedance flow plan please, including locations of predicted flooding. I note that the top of bank of swale shown on the SuDS layout drawings is 4.95m, but 5.3m on cross sections, please can this be corrected to be consistent.

Once these details have been supplied and providing they are okay I will look to recommend discharge of the main surface water drainage condition. I will discuss the other drainage conditions with Paul to agree where we currently stand.

Kind regards,
