Subject: ADC App ref P/68/21/PL - Appropriate Assessment (Your Ref 355777)

Dear Sir/Madam,

In your consultation response dated 14/06/21, you advise that it is a matter for us to decide whether an appropriate assessment of this proposal is necessary in light of the People Over Wind Ruling and that in accordance with the Conservation of Habitats & Species Regulations 2017 (as amended), Natural England must be consulted on any appropriate assessment your Authority may decide to make.

We have prepared the attached Appropriate Assessment and now write to seek your views on it.

In accordance with your consultation response, this appropriate assessment is being sent to NE for your comment. Please provide a response within 10 days or advise if longer is required.

Kind Regards

Simon J Davis MRTPI
Principal Planning Officer
Directorate of Place

Habitat Regulation Assessment (HRA) Screening Matrix and Appropriate Assessment Statement

PLEASE NOTE: Undertaking the HRA process is the responsibility of Arun District Council as the Competent Authority for the purpose of the Habitats Regulations, however, it is the responsibility of the applicant to provide the Council with the information that we require for this purpose. This template is to be used only for potential impacts on the Pagham Harbour SPA/Ramsar site.

This template is for use where an application will result in additional overnight accommodation being created and/or a net increase in the population served by a wastewater system, including new homes, student accommodation, tourism attractions and tourist accommodation

Application reference:	P/68/21/PL
Application address:	Amusement Arcade, Beach Road, Bognor Regis, PO21 4SX
Application description:	Part change of use of existing amusement arcade to managers accommodation (resubmission following P/48/20/PL).
Status of Application:	Undecided
Proximity to SPA/SAC/Ramsar. Is the application site:	Is within both the 400m and 5km zones of influence for Pagham Harbour SPA / Ramsar site.
Grid Ref. (if no address)	Not known
Planning Officer:	Simon Davis

Stage 1 - details of the plan or project	
1a) European site potentially impacted by planning application, plan or project: [if no, then record the evidence submitted as to why there is no mechanism of impact]	YES - recreational disturbance only
1b) If YES to question (1a) then is the planning application, project or plan directly connected with or necessary to the management of the site? [if yes, then the applicant should have provided evidence and justification]	NO
1c) If NO to question (1b) then other than for applications where recreational disturbance is the only mechanism of impact (where the impact is always in combination with other residential developments), are there any other projects or plans that together with the planning application	N/A - recreational disturbance only

being assessed could affect the site? [Applicant to provide the information sufficient to allow an 'in combination' effect to be assessed]

Stage 2 - HRA screening assessment

Test 1: the significance test – The Applicant is to provide evidence so that a judgement can be made as to whether there could be any potential significant impacts of the development on the integrity of the SPA/Ramsar.

Following a recent CJEU ruling, we can no longer take into account any avoidance and mitigation measures as part of the application at this stage of HRA. For applications where recreational disturbance is the only mechanism of impact, Natural England's advice is that such applications without mitigation will have a likely significant effect on the SPA(s) in combination with other residential development in the zones of influence. Therefore, such applications, even where a payment to a scheme of mitigation is proposed, will progress directly to Stage 3.

YES – Natural England Consultation response dated 13/07/20 (received in response to the previously withdrawn application) advises that the impact is from increased recreational disturbance. As mitigation measures cannot be considered at this stage, it must be concluded that the proposal will have a likely significant effect on the SPA in combination with other new residential development in the zones of influence.

Stage 3 - HRA – Appropriate Assessment

Test 2: the integrity test – If there are any potential significant impacts, the applicant must provide evidence showing avoidance and/or mitigation measures to allow an Assessment to be made. Other than for the Pagham Joint Scheme of Mitigation, the Applicant must also provide details which demonstrate any long-term management, maintenance, and funding of any solution.

The likely effectiveness and long-term financial robustness of the Pagham Joint Scheme of Mitigation has already been examined by Natural England, so the applicant does not need to provide their own evidence base on these aspects. Instead evidence should be submitted that a mitigation contribution payment has either:

- been made to the appropriate scheme through a Unilateral Undertaking
- or will be made through a s106 agreement where Heads of Terms have been agreed and the agreement will be signed prior to any permission being granted.

This application if approved will be subject to a S.106 Agreement to secure a contribution of £871 towards the Pagham Access Management measures.

Recreational Disturbance

Part 1: Conservation objectives for the SPA site

Ensure that the integrity of the site is maintained or restored as appropriate and ensure that the site contributes to achieving the aims of the Wild Birds Directive, by maintaining or restoring.

- The extent and distribution of the habitats of the qualifying features
- The structure and function of the habitats of the qualifying features
- The supporting processes on which the habitats of the qualifying features rely

- The population of each of the qualifying features, and,
- The distribution of the qualifying features within the site

Qualifying Features (Pagham Harbour SPA)

A046a *Branta bernicla bernicla*; Dark-bellied brent goose (Non-breeding)

A151 *Philomachus pugnax*; Ruff (Non-breeding)

A193 *Sterna hirundo*; Common tern (Breeding)

A195 *Sterna albifrons*; Little tern (Breeding)

Qualifying Features (Pagham Harbour Ramsar Site)

- *Branta bernicla bernicla* Dark-bellied brent goose

Part 2: Assessment of Effects on Site Integrity

Assessment Matrix (Pagham Harbour SPA/Ramsar site)

Potential Effect	Site Conservation Objective(s)	Qualifying features	Potential for Impact?	Relevant Mitigation Measures
Decrease in survival rates and populations of over-wintering and breeding birds due to increase in disturbance, caused by increasing human population (in combination with other plans and projects)	Maintain or restore the population of each of the qualifying features. Maintain or restore the distribution of the qualifying feature within the site.	All for Pagham Harbour SPA and Pagham Harbour Ramsar Site	Yes. Indirect impact. Without mitigation, bird populations would be reduced and/or re-distributed by increased numbers of visitors arising from the new dwelling leading to increased disturbance. However, it is material that the accommodation is for an on-site employee who may already be active in the local area. Furthermore, the accommodation represents part of an existing building footprint.	Pagham Joint Scheme of Mitigation (contribution of £13,065 secured by S.106) The scheme includes: • Provision of 1.5FTE Visitor Experience officer (VEO) post at RSPB Pagham. The role of the VEO will be to educate and inform visitors and the surrounding community about recreational disturbance, its impacts on birds and wildlife-friendly ways to behave when visiting the coast and Pagham in particular. • Provision of general 'Dog Initiatives' – a broad range of measures (jointly with Bird Aware Solent) to encourage responsible dog

				ownership at the coast and visits to alternative dog – friendly sites. • Independent monitoring surveys (every two or three years).
Direct loss of habitat	Maintain or restore the extent and distribution of the habitats of the qualifying features.	All for Pagham Harbour SPA, Pagham Harbour Ramsar site	No loss of European Site habitat.	N/A. No impact so no mitigation necessary.

Stage 4 – Summary of the Appropriate Assessment (To be carried out by the Competent Authority (Arun District Council) in consultation with Natural England)

Conclusion

Having considered the proposed mitigation and avoidance measures to be provided in-perpetuity through the secured contribution to the Pagham Joint Scheme of Mitigation, Arun District Council concludes that with mitigation the plan or project will not have an Adverse Effect on the Integrity of the European protected site(s).

Having made this appropriate assessment of the implications of the plan or project for the site(s) in view of that (those) site(s)'s conservation objectives and having consulted Natural England and fully considered any representation received (see below), the authority may now agree to the plan or project under regulation 63 of the Conservation of Habitats and Species Regulations 2017.
