Friday, 17th February 2017

Dear Sir,

RE: PLANNING APPLICATION No. P/6/17/OUT

I hereby wish to register my objection to the above on the grounds of it being unsustainable. As well as historical and increased flooding risk building these houses would mean much heavier traffic, increased pressure on our doctors surgery etc. Therefore I vote NO.

Yours sincerely

MR C.W. FOX

RECEIVED

Dear Sirs,

RE: OBJECTION TO PLANNING APPLICATION
NO. P/6/17/OUT.

I hereby wish to object to the above planning application on the grounds of it being unsustainable. Building more houses, especially on the grand scale proposed, will only increase the pressure on our G.P. surgery etc. It is already virtually impossible to get an appointment. Another consideration is the volume of traffic that would increase if this large scale housing development were to take place.

Leave our Grade 2 farmland alone.

Yours sincerely

MRS JULIE FOX

Ref 7/6/17/OUT

Dear Sir,

I would like to object
to the proposed plan of the above
reference, on the grounds of:
It is unsustainable

There is increased pressure on hospitals,
doctors surgeries, (difficult to recruit
g.p.'s at present). Schools both
secondary and junior.
The destruction of our community

Dear Planning dept;

I would like to object to the planning application P/6/17/.OUT.

I have lived in near Hook Lane for over thirty years, and the field north of Hook Lane floods every winter, locals call it Hook Lake, The rain water comes off the field and onto Hook Lane and the houses there.

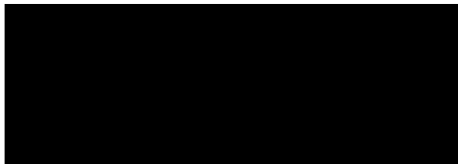

Also we were led to believe that the Hook Lane field is the mark of the Strategic Gap between Pagham and Chichester boundary, we were told it would never be built on. This obviously is no longer the case.

The road to Chichester is already a death trap. With the increase of Lorries from Barfoots, due to the farms expansion, and all the properties you intend to cram into this small village, this problem will only get worse.

The doctors and schools are full to capacity already, you have to book your illness in advance to be able to get a doctors appointment as it is.

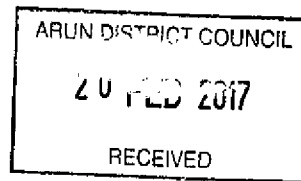

I do not believe this building program in Pagham is sustainable. Please stop swallowing up our village.

Yours faithfully,

Mr M Mays.

Planning application P/6/17/OUT (Hook Lane)

I wish to object to the above planning application on the grounds that I believe the building of the homes planned will mean an unsustainable environment for a host of reasons. The site in question already floods during the wet weather, and despite the 'promises' that this will be taken into consideration when the houses are built, the historical evidence of flooding in this country on flood sites that have been built on reminds of us each winter of the damage caused by unfettered building programmes.

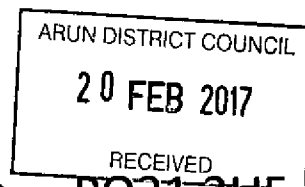

In this area of Pagham, we have the already notorious A27 road to contend with, and it isn't helped by the enormous flow of traffic to and from this major road along our own, Pagham Road during rush hour. The increased volume of cars, service vehicles and industrial traffic will raise the risk level on the Pagham Road to a dangerous level. There is already an application in to increase the local industry to an unacceptable level, which will multiply the number of articulated lorries using our road.

The addition to our local population will increase the pressure on our already overloaded doctors, dentists, schools and hospitals, and please take note that the aging population in Pagham is increasing. This will not help either because of the additional pressure on the local A&E ambulances that are almost part and parcel of our everyday traffic here.

If the planning application goes through, it will overburden our already fragile eco structure without thought to the real consequences.

Patricia Parker

20 February 2017

Sirs

With regard to the above mentioned inquiry. Do you realize that the site is prone to flooding in parts, would like to live there and have a soggy bottom?

Getting serious though. Just think off the extra traffic, it is bad enough now, plus it is difficult to get a doctors/dentists appointment. Plus trying to get an appointment at St Richard's is nigh on impossible.

Do any of you on this inquiry live in this area? If you do, you know what is like at the moment.

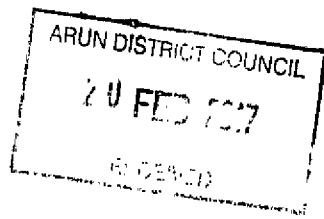

I have just read about raw sewage being pumped into the Rife, Have you read the report on this in the local *Bognor Regis Post*. Perhaps when the tide is right, it might wash up on a beach near you.

Surely the whole plan is unsustainable. Think about this.

You
