RECEIVED

Dear Sir

I refer to the above planning application P/6/17/OUT. Hook Lane.

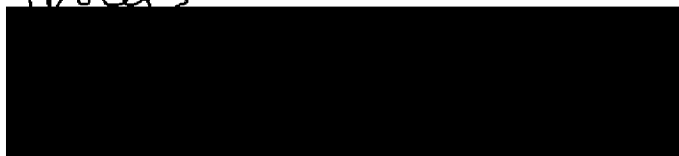

The use of this arable land - which is always wet - could lead to a great deal of flooding in the area with the proposed number of properties.

The increase in traffic would be enormous. We have great difficulty in getting out of our site now & to walk across the road is taking your life in your hands.

It is difficult to get Doctors appointments - they are already under great pressure. As too one Dentist Hospitals and schools, along with all services that would be required.

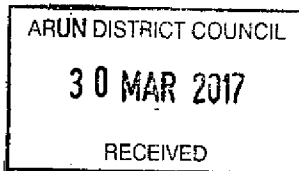

Therefore I object to this going ahead.

Yours

Proposed

Dear Sir,

I am writing to object to the large amount of Building proposed in this already restricted area,

Hook Lane that we all know is under water for many months, Roads already under a bad state of repair and will get worse,

Local shopping is already short of parking areas. Other facilities such as Doctors

appointments already difficult to get will take longer, more schools will be required. All these things seem to be getting unsustainable.

Yours Sincerely
