Subject: Proposed development - P/6/17/OUT - Hook Lane

Dear Sirs

I write in respect of the above development and would wish to comment as follows - as an objection the above proposed development

Our local economy is not such that it supports the kind of employment which will pay sufficient salaries to support a mortgage - and thus folks moving into the proposed housing will have to commute to places of work. Already the road from Pagham through to the Whyke Roundabout/A27 is a virtual standstill during the morning and evening commutes and, once into Chichester, the parking spaces at Chichester Rail Station are now at a premium and it is now impossible to park in and around the Bognor Rail Station, to commute to town. This, coupled with the breakdown of proposed upgrading works to the A27 and the proposed housing at Chalcraft Lane, will make the local area a worse gridlock which, in turn, will contribute to air pollution, and associated health implications, for families already living in this catchment.

As you are working on behalf of folks already resident within Pagham I would ask you to consider these matters when looking at the proposed development.

Yours
Carol Penny
