

# Coastal West Sussex Clinical Commissioning Group

Simon Clavell-Bate  
Head of Finance  
CWS CCG

Friday 28<sup>th</sup> July, 2017.

## Specific application note

(See Appendix 1)

P/6/17/OUT

**Proposal Outline application with some matters reserved for construction of up to 300 No. new homes, Care home of up to 80 No. beds, D1 uses of up to 4000sqm including a 2 form entry Primary School, formation of new means of access onto Hook Lane & Pagham Road, new pedestrian & cycle links, the laying out of open space, new strategic landscaping, habitat creation, drainage features & associated ground works & infrastructure. This application is a Departure from the development plan**  
**Location - Land North of Hook Lane Pagham**

Coastal West Sussex Clinical Commissioning Group (CWS CCG) has been working with Local Authorities and Developers for many years and has an established clear tariff contribution pro-forma for Developer Contributions.

The pro forma has been developed in conjunction with the District Valuer (professional & independent) and is regularly updated.

The CCG has also reviewed other government / centrally provided services (such as the Fire and Rescue services, libraries) with relation to developer contributions to infrastructure that directly relate to housing / infrastructure development, in order to be fair and reasonable. The important factor is to have services in place for population needs.

Additional population generated by this development will place an increased demand on the existing health care that provides services to the area. In the absence of developer contributions towards the provision of additional infrastructure, CWS CCG would be unable to retain the high level of health care that is provided in the area and would therefore have to OBJECT to the development proposal.

## 1. Financial arrangements

All new housing / infrastructure has a direct impact on health care in the region. All residents will register with a GP when moving to a new home.

At present, Primary Care services are run by General Practitioners (GP's) as a partnership. These are stand-alone businesses that are funded materially from CCG's (Clinical Commissioning Groups), who do so as Co-Commissioner partners of NHS England.

Historically and current state is that the premises that GP's run services from are based on old established 'houses' linked together (modified) with some aging built for purpose premises.

The CCG does not have direct capital funding for Primary Care services. There are limited and scarce funds available that have to be applied for at a regional / national level.

Criteria such as new developments and developer contributions are a key factor in decision making, as the funding available needs to be directed to area of need (and funding is scarce). The key question from central NHS funds is "what funding has been secured from housing development" when applying for any central capital investment.

The funding for new builds or Premises extensions/infrastructure comes from materially 2 sources, linked on the whole to new housing development growth.

- i. S.106 funds (or CIL equivalent)
- ii. CCG revenue allocation

Revenue funds from the NHS are used to run and maintain services that continually have a higher demand than the resource available. Arun has a high frail and aged population with associated health needs. Therefore there is a high demand factor for health and a need Health funds are provided and used for the existing population of the area and thus housing growth infrastructure costs are sourced and necessary from housing developments.

Revenue funds for Health organisations are limited and challenging currently. Many NHS bodies did not meet the requirement to break even financially, and in 2016/17 Coastal West Sussex CCG was one of those bodies. As such, funding for the foreseeable future will be exceedingly limited, as there remains a requirement to payback any financial gaps and at the same time there is a requirement still to make year on year efficiency savings (cash releasing).

The funding will be a contribution to "**Grove House GP surgery**" for the infrastructure needs of managing GP consultant Health Care. The costing of the project follows in section 4.

### Grove House GP Surgery and P/6/17/OUT 300 homes + 80 bed Care Home Location

## 2. Assessment & request

Coastal West Sussex CCG has taken an assessment of the implications of growth and the delivery of housing upon the health need of the Arun District, and in particular the major settlements in the district where new development is being directed towards. We have established that in order to maintain the current level of healthcare developer contributions towards the provision of capital infrastructure will be required. This information is disclosed to secure essential developer contributions and acknowledge as a fundamental requirement to the sound planning of the District.

The additional population generated by the development will inevitably place additional demand upon the existing level of health provision in the area. In the absence of developer contributions towards the provision of additional health infrastructure the additional strain placed on health resources would have a significant detrimental impact on District wide health provision.

Health utilises the legal advice outcomes and industry professional inputs from other public funded area, such as the Police service. With the direct impact of new housing and house growth plans on registered patients, the submission that follows captures the necessary, directly related and fair/reasonable contributions required that relate to the associated house build volumes. The tried and tested formula used has been in use for many years and is annually reviewed.

## 3. Current Healthcare in Arun

Primary Care services in Arun are provided by 15 GP businesses (GP practices), funded on the main from NHS funds for providing Primary health care.

Each practice site is either owned outright (entirely owned, mortgaged or other financial arrangement) or leased from a landlord.

Some sites are purpose built in prior decades, or are run from converted houses (as per the original NHS start point for General Practice).

Patient demand is high in the Arun area and the proportion of patients over the age of 65 was high, at 27%.

|--------------|----------------|----------------|---------------|------------|

England Ave = 17.7%

The current estate for Arun is of an older nature and is more than 25% below expected size requirements for the population size.

The impact of an aging population (Arun at 27% and England average of 17.7% ONS data), cramped premises, short supply of any medical/nursing staff and increase in demand for GP services puts a very high strain on GP resources.

The effect of this has already been found in Arun with a GP service having closed in 2016 and the patients having to re-register and be cared for by other GP practices.

The proposed development will need to have Primary Care infrastructure in place in order to care for the population increase.

This contribution requested will be for the necessary infrastructure to cater for the site development at the most local GP service site(s) and encompass all the necessary components of patient need, whether at the GP practice or neighbouring service area.

#### 4. Costs

**The contribution for project P/6/17/OUT is £402,673**

Appendix 1 shows the application data.

The contribution calculation is set out on the following page and is consistent with all previous s.106 development requests. It is also consistent with other public sector contribution working, such as education/libraries and Fire and Rescue services. Both internal health and other Public sector workings are reviewed on a regular basis.

##### The Site location

The impact of this proposed housing build will directly fall onto the provision of healthcare at Grove House GP Surgery.

The current Grove House GP surgery estate and now serves 11,800 patients. Grove House is now at full capacity with regard to patient numbers and clinics.

The impact of this proposed housing build will directly fall onto the provision of healthcare at Grove House GP Surgery.

Without any infrastructure increase and improvement, the practice would not be able to provide Health services to the new residents.

The only option would be to object to the development plan – however we feel this will not be necessary as there have been proposals for infrastructure improvement approved in other areas and see working together on housing need and infrastructure as a positive step forward for the benefit of all.

I can confirm that there is estate capacity, due to land area around the practice, to build the necessary additional estate and associated infrastructure. The GP's themselves are also supportive of the housing build, so long as there is estate and infrastructure support.

The funding (health tariff) will be one of the 5 contributions towards the cost of infrastructure that will require the additional build at **Grove House GP surgery**.

300 homes for this current development will have a significant impact. As noted in the "current healthcare in Arun (section 3)", there is already a high proportion of elderly over 65's in the area. The application notes there may be a provision for a care home site too. This will cause a further requirement on the GP practice. The impact of a care home has been based on a single bed basis, with a 25% uplift for the nature of the residents (the CCG utilises tariff uplifts of up to 100% for this cohort of GP patients).

The GP partners run a good practice and they are enthusiastic around the house growth in the area and providing the associated Primary Care services that will be needed.

This initial plan has also been shared with their neighbouring practice with regard to overall plans for the area. The expansion of Grove House surgery was supported.

# Costing Template (Health Tariff)

| S106 Contribution to NHS/GP Community/Specialist Service (Formula agreed by The District Valuer)                                                                                                                                                                                                 |             |                             |                                                                                                                                               |                  |                                      |                          |                                     |

## **5. Compliance with National Policy and CIL regulations**

### **i. Necessary to make the proposed development in planning terms**

Health provision and to a large extent access to Primary Care GP services is high on the agenda of households and is a particular aspect of all government party manifestos.

Arun's emerging local plan has increasing incremental annual growth assumptions for housing development. Strategic sites are potentially going to deliver in excess of 1,000 homes per year coupled with non-strategic housing developments such as this.

The volume of housing and occupancy has a necessary impact on the current capacity of the estate that will require additional clinic rooms and medical professionals (and associated support service costs and staff). In order to maintain current healthcare provision, increased estate is necessary.

There is no dedicated Government funding to cover new housing developments. Unless contributions from developments are secured, at worst there will be practices that would be forced to close as there would not be safe healthcare provision. In the least, there will be wait times (mainly driven by no estate / rooms to see patients in) would not be suitable for adequate healthcare.

The plan is therefore to utilise any GP estate that can be 'extended' or built on in the shorter term. In the medium term, there are plans for new GP estate to be built on strategic sites as per the Arun emerging local plan (2011-2031).

### **ii. Directly related**

There is a functional and direct link between the development and the contribution requested. Put simply, without the development taking place and the subsequent population growth there would be no requirement for the additional infrastructure.

The proposed developer contribution is to help achieve a proportionate increase to health infrastructure, to maintain its current level of service in the area.

The infrastructure highlighted and costed is specifically related to the scale of development proposed. This has been tried and tested and has District Valuer support, in terms of the value of contribution.

### **iii. Fair and reasonably related in scale and kind to the proposed development**

The developer contribution is to help achieve a proportionate increase in health infrastructure, thus enabling health to maintain its current level of service. Utilising a housing size as a reasonable proportion of infrastructure scale allows for fairness to all new housing developments, including the sites that are also strategic in nature.

A review of the police CIL compliance and their review of education and library compliance underlie the fair and reasonable approach of the health tariff – which is in turn in line with the other public sector areas.

I trust this sets out the request for infrastructure contributions relating to this development.

Thank you for the continued support in securing health infrastructure contributions to enable the population of Arun to have access to the health care that it needs now and for future generations.

Yours sincerely,

*S. Bate*

#### 3. Description of the Proposal

Please indicate all those reserved matters for which approval is being sought:

☒ Access ☐ Appearance ☐ Landscaping ☐ Layout ☐ Scale

Please describe the proposal:

The construction of up to 300 new homes, a care home of up to 80 beds, D1 uses of up to 4,000 sq.m including a 2 form entry primary school, the formation of new means of access onto Hook Lane and Pagham Road, new pedestrian and cycle links, the laying out of open space, new strategic landscaping, habitat creation, drainage features and associated ground works and infrastructure

Has the building or works already been carried out? ☐ Yes ☒ No
