Subject: Planning Objections

I am objecting to the latest outline planning applications regarding

P/136/16/OUT P/140/16/Out and P/6/17/Out, a quite ridiculous

situation to plan more houses when the water company admit they cannot cope with the present existing demand from the houses already in the area, anyone that has witnessed the state, condition and amount of traffic now on Pagham Road is worse than living in many main city areas, plus Arun seem to care not a jot about the Pagham aea at all except to collect council taxes off the residents, most of this traffic is caused by the Barfoot company who seem 'Hell Bent' on creating even more havoc by their extended factory facility, it is that company that is the main contributor to the traffic congestion and building houses in the area, Pagham village is dangerous enough with the new houses being constructed by the Inglenook Hotel and a further future fear for all in Pagham is the now wish of Inglenook to develop their paddock car park area into an estate thus overlooking people's privacy in Mill Farm Drive.....doubtful that Arun Council will care about that either!!!! Arun seem to disregard anything that is an objection in Pagham at all yet they just agree to what any planning that is put forward by a well financed company.

Your sincerely,

Michael Flanagan, 33 Oaktree Close, Pagham, PO21 3PN
