

The following amendments have been made to the approved Construction, Environmental Plan (CEMP) endeavouring to mitigate the impact of traffic to the Summer Lane residents. We are negotiating with the Church to secure access through the Church grounds along a newly constructed haul road on the POS, south of Summer Lane.

Before commencing construction of the haul road we seek approval of the amendment to the CEMP as shown below:-

5.1 Public Access and Traffic Management

- 5.1.1 Construction traffic associated with the proposed development may access the site from the direction of Pagham Road, through Church Car park onto newly constructed temporary haul road and then on to the non-adopted Summer Lane.
Please refer to traffic route plan enclosed for full details.
- 5.1.2 Where possible, measures will be adopted to ensure that construction traffic travels minimal distances along sensitive routes (residential or congested roads) and those vehicles are kept clean and sheeted when on public highways.
- 5.1.3 Action will be taken to minimise and control any nuisance arising from construction traffic by using measures such as controlling vehicle speed, use of sweepers, wheel washing and keeping all site entrances clean.

Traffic Route Plan
