THE ACORN RANGE OF GARAGES

One, Two, Three and Four Bay Traditional Style Garages with a choice of Cross Sections to accommodate small, medium and larger size vehicles.

www.oakdesigns.org

THE ACORN RANGE

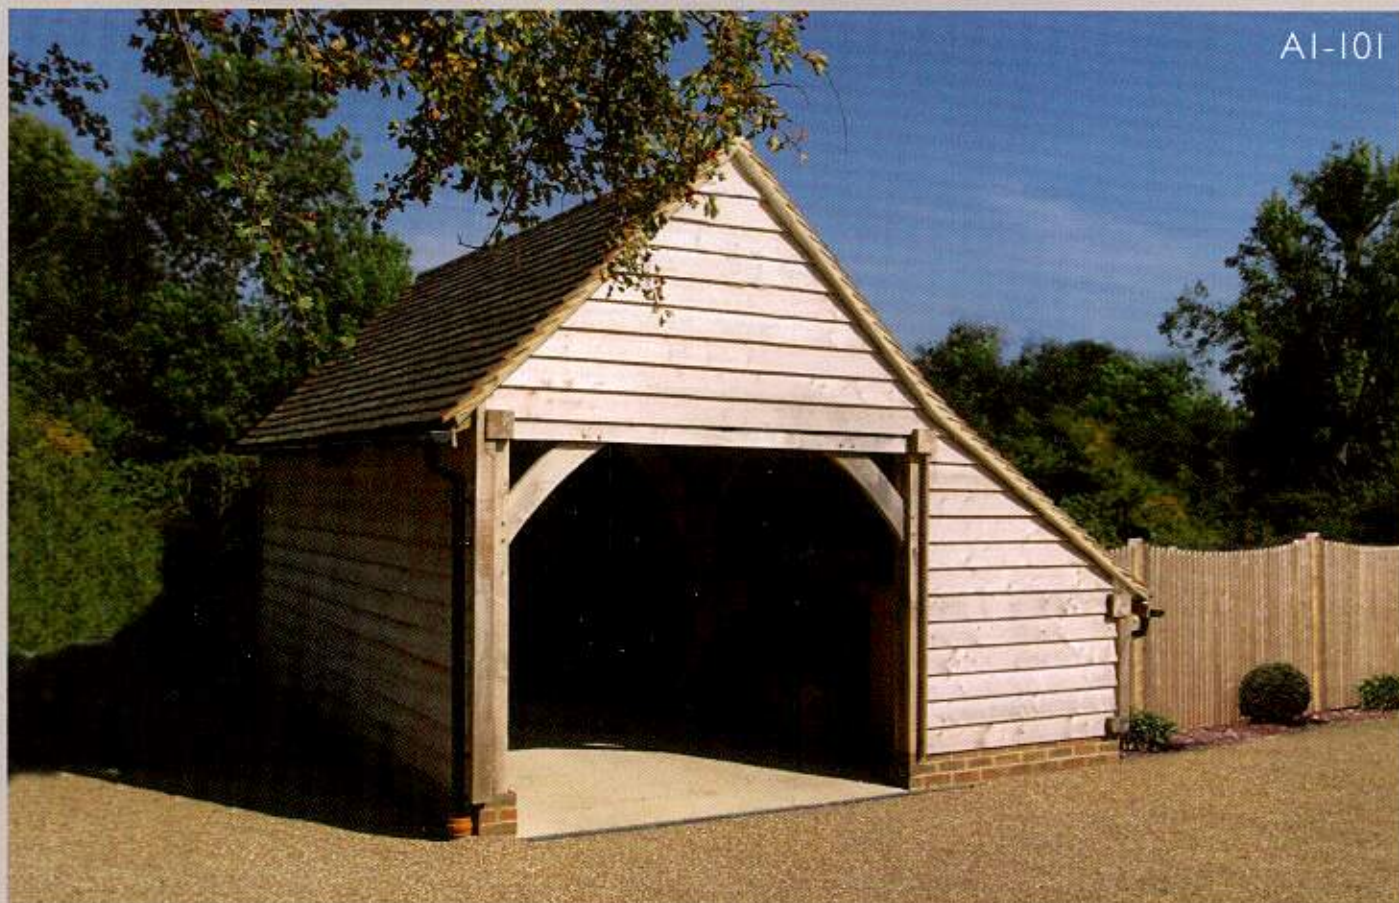

The Acorn Budget Range of garages offers 480 variations of style and size to suit small, medium and larger vehicles.

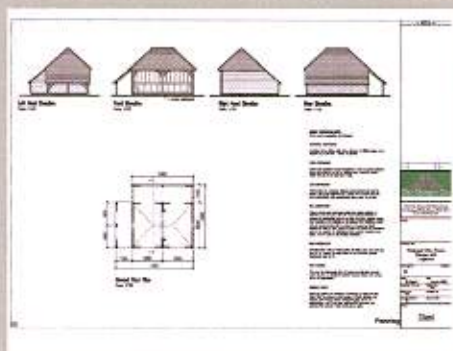

These traditional timber framed structures are built to standard designs, this allows us to produce buildings of varying sizes extremely

cost effectively. All our designs have been fully approved by structural engineers to comply with Building Regulations. Please note buildings of less than 30m² internal dimensions are exempt from Building Regulations unless sited within one metre of a boundary.

Choose partitions, doors and windows from our Accessories Sheet to customise your building. The timber kits are pre-assembled at our workshop to ensure all components fit perfectly, prior to being delivered complete with pegs, pins, nails and full assembly instructions.
