Subject: Planning application for Barfoots of Botley - Sefter Farm P/76/16/PL

It has come to our notice that the above application has been put forward for extension to the existing farm. As you are aware the Pagham rd. is now heavily used by farm vehicles and has lead to a number of traffic problems, we would also mention the enormous housing estate that is proposed for sefter rd/rose green rd which we cannot even begin to imagine the utter chaos all the new buildings - farm and private - will cause. Pagham-rose green is an area that could not possible cope with all the upheaval - modest houses with modest people and facilities. Infact as we write tractors have just thundered passed and continue into evening. We must ask you to consider this application on behalf of local residents, please.
