

33 Mill Farm Drive
Pagham
Bognor Regis
West Sussex
PO20 3NG

Reference Barfoots planning application.

We feel we must voice our concern regarding the above.

The construction and use of the new building will create more noise and light pollution, even though a theory has been put forward that the building will protect us from this, we doubt if this is viable.

The bio-digesters will also create a great deal of noise and smell. We value our peace and quiet and noise particularly at night would be a disaster to the area.

The area is prone to flooding so the extra concrete and buildings will only make matters worse.

We are also worried about the extra traffic. The Pagham Road is not very wide with lots of bends, in places not wide enough for two vehicles to pass. We have witnessed lorries having difficulty in negotiating corners. These roads are just not suitable and we feel that this situation is an accident waiting to happen.

If the proposed excessive housing construction is granted this will only exacerbate this problem turning our lovely village into a nightmare.

Please would someone consider the feelings of the people in the neighbourhood who very much love to reside where they do.

C & L DAVIES
