I refer to previous comments in respect of P/5/08 - reproduced below. No additional comments.

Environmental Health makes the following comments on this application:

We have reviewed the application in respect of emissions to air, noise and light impacts. We agree with the conclusions in the Environmental Statement that emissions to air and noise impacts will not be significant.

The application states that there will be no external lighting on site, and that lighting is not required for plant growth, but some internal lighting will be required for safe working.

We are surprised that external lighting will not be required, at some stage, for safe working. Should external lighting be required in future, but is not referred to in this application, will this require a new application? If external lighting could be installed without planning approval we recommend a condition that any external lighting should only be installed in accordance with a scheme submitted to and approved by the LPA.

We recommend that a condition is imposed which requires any lighting scheme for internal illumination is in accordance with a scheme submitted to and approved by the LPA.
