Thank you for your internet representation made on 8th June 2021 which has been recorded as an objection with the comments as follows:

OWPC37228

Having worked in the construction industry all of my working life. And having my own ground work company for many of those years. I can honestly say that the proposed Mitigation of surface water as suggested is a disaster waiting to happen. All well and good during dry weather but the weather patterns are forever changing and leaning towards more and more wet weather the ground in this area is prone to flooding already. So this thinking of replacing soil (which absorbs water) with concrete and other construction materials (which doesn't absorb water so well) will result in an overload of surface water which the proposed drainage exit from site will not cope with without causing considerable problems to the surrounding areas.

Your views as made above will be considered before the application is determined.
