Dear Mr Davis,

Could I please add my points below in relation to the response from Ivon Blumer Architects, to Planning Application No. P/86/15/PL. at 11 Abbottsbury.

We still feel that a loss of natural day light is going to be an issue in the Kitchen window and both bathroom windows and possibly the conservatory, as the roof line is going to be much higher than the existing garage roof line. This will take away any natural light into these windows. (please see from the pictures attached, if this is to be filled with the apex of the roof you can see what will be lost)

Close communities, are a big part of any village, so it would seem a great shame that constant back garden grabbing could jeopardise this. Please consider the people who have made these their forever homes. Some of us have put everything we have into them.

We would welcome any inspector from Arun Planning Department to view the site, so they could see the impact this would have to the local residents.

Kind Regards

Mr and Mrs West
2 Golden Acre, Pagham.
