Dear Sir,

re. Application ref: P/93/21/PL

Creating a temporary alternative outflow channel to reduce/avoid flood and erosion risk to properties and businesses at Pagham Beach and Haven Church Farm over the Autumn 2021.

Location: Church Norton Spit, Pagham Beach, Pagham

The Company has considered the above Application, and indeed has been a Member of the Pagham Beach Coastal Issues Group since its inception. The Directors and shareholders fully support the proposals of this Application to protect the homes and businesses at Pagham Beach, both in the short term as proposed by this scheme, but also in the long term, to ensure the continuation of a thriving community.

As defined in item 3 of the Pagham Harbour & Church Norton Spit Adaptive Management Report, the present system is **not** natural, but has been the subject of quite extensive human intervention since the mid-late 19thC and it therefore seems entirely reasonable that further intervention is allowed to reduce the flooding and erosion at Pagham Beach.

Yours faithfully,
