Subject: Natural England's comments on the HRA for applications P/93/21/PL (Arun DC) and 21/01921/FULEIA (Chichester DC)

Dear Alistair,

Further to our meeting earlier with Nick Gibb MP, please see below summary of the items required by Natural England.

- (1) Construction management plan being secured as it's a key mitigation measure (page 1)

This should include details of the operations to breach the spit and to create the compensatory little tern island. Should you require clarification, then please speak with Natural England.

It should also include the items requested by WSCC Highways including construction site set up (i.e. if there will be a construction base on the beach, contractor parking, location of stored plant/vehicles etc) and access routes to/from the site. See WSCC Highway comments dated 21/07/21 on our website for more information.

- (2) Is there still funding for future adoptive management of the breach if it shows signs of closing (page 5). Previously we accepted the attached letter from the PFDT and I consider that the same needs to be provided albeit a new letter and for a period of 5 years from end October 2021.

- (3) The size of the compensation island - is it designed to maintain the population at the current 46 pairs? (page 19)

Should you require clarification, then please speak with Natural England

- (4) The future management of the compensation site if it does start to erode (page 32)

Should you require clarification, then please speak with Natural England

These are all set out as comments (by Natural England) within the tracked changes version of the HRA that is on Arun DC's website. I have given you the page numbers of the above points within the tracked changes document.

Kind Regards

Simon J Davis MRTPI
