Subject: Pagham and environs

Dear Planning officers

We wish to voice widely held concerns over our favourite coastal area, often visited over a lifetime with four generations of family.

We respectfully request for you to please kindly and urgently consider the points below.

We support the managed breach of the 'spit' at Pagham harbour and other measures to redress threatened lost environment.

We suggest that actioning this is vital as the area is treasured for leisure and recreation and beauty.

Although this is an extremely busy time of year we wish to add our support to those commending the proposal and documents submitted by ABPmer re the managed breach solution.

Kind regards

Linda and Rob Huxley
