Pagham Beach Situation.

Dear Sirs

As you are aware the state of Pagham Beach is dire. The beach has been defeated unless a single mouth is cut through at the site of the original entrance to the ocean. The estate will be swamped by the ocean unless you and Arun district council can control the cut at the designated site. The beach is now desperate for a cut through at the designated line. I do not know how the original documentation has been detailed but the site is now desperate for the whole process to be speeded up.

I do not know the in's and out's of the whole process but it is imperative that the process is speeded up, it is of great urgency in order to save the village of Pagham and the surrounding area being overwhelmed by the sea.

Do NOT waste any more tax payer's money with the sticking plaster operations which fail every time.

Yours faithfully
