Planning Application ref.P/97/15/PL
Pagham Beach managed breach of Spit

I write in support of the Proposal to breach the shingle spit which has recently built in Pagham Harbour.

You should be aware that this new Spit is causing the long established Pagham Rife to discharge parallel to the beach. This has resulted in erosion of this beach due to the scouring effect of the new current.

This erosion threatens to destroy the existing sea defences, so increasing the flood risk to long established dwellings. Indeed, some evidence is already visible.

This threat would be eliminated by cutting the Spit, as proposed in the Planning Application.

I strongly support the Application.

Don Lambert,
18 Cardinals Drive, Pagham
