Hi Stuart,

Please see attached updated drawings, including a minor correction to the existing elevation plan, and I have added the existing outbuilding in dotted / hidden on the proposed elevations as requested.

I am not sure what more detail I can provide to the cross-section P006_B so please could you give me a call to explain what exactly you require, and I will get this done immediately. I have left you a voicemail also this morning.

Please also accept this email as my acceptance to the time extension of this assessment.

Kind Regards,

Paul Wright

Paul,

Thank you for the email and attached plans.

What would be helpful is a cross section and elevation of the proposed development inclusive of the site arrangement with the existing outbuilding (dotted line) in addition to extant permission under P/18/03. This level of plan would make the situation more clear and assist with the assessment.

Once this has been provided and with your agreement an extension of time to conclude our the assessment would be appreciated.

Thanks very much!

Hi Stuart,

As per our phone conversation earlier today, please find attached revised drawings to show the existing structures. I have also provided an additional section view to demonstrate the complete obscuration of the side flank window of No. 4 Pagham Road from the balcony area.

Any further questions, please advise.

Kind Regards

Paul Wright
