The tree in question is a mature Indian Bean Tree in good health. This tree is located in the rear garden of the property and currently over hangs the adjacent property . The tree is a fantastic specimen and provides a good amity value to the surrounding area.
Were are keen to maintain the tree at a sensible size long term, so the proposed work would be a 1.5 metre crown reduction to where previously pruned. This would keep all pruning wounds to bellow 100mm in diameter which would be in accordance of with British standards 3998.2010.
