Planning Application Ref: R/102/20/PL

Land North of the Spires, Cross Road, Rustington

The groups of macrocarpas also mentioned by other neighbours (TG03 & TG04) are a vital amenity visually, adding significant character to the wooded appearance of the area, as well as providing screening between surrounding houses especially at the upper floor level. Most importantly they also provide a vital habitat to protected species of wildlife and numerous species of birds. There should be a condition set that these trees are maintained in their current form.

It is critical that residents are consulted/taken into account when determining the CTMP, especially if basement foundation works are planned which will result in the introduction of very heavy machinery onto private roads and substantial earthworks removal. During these works residents would undoubtedly suffer excessive noise and vibration, disruption, and extra volumes of heavy traffic on to what is a quiet, tree-lined residential street with speed bumps. Cross Road itself, especially at the junction with Jervis Avenue is not in good enough condition to bear the extra weight and volume of such heavy traffic. The routing of construction traffic should aim to minimise impact on damage to road surfaces as well as residents' amenity.

Your views as made above will be considered before the application is determined.
