Subject: RE: Request for further information R/11/21/PL

Dear Mr Lecuyer

Assuming that there have been no other changes to the approved plans on reference R/12/19/HH, you could submit the Proposed Floor plans as submitted on R/12/19/HH, clearly labelling them existing and proposed. Where there is no change on the elevations, these could also be submitted as existing and proposed. For any elevation that is different, you should submit accurate drawings clearly showing the changes. The Location Plan that was submitted on application R/12/19/HH could also be submitted again for this application.

Amber has confirmed the application required is a Variation of Condition.

Please submit the plans as a PDF (ensuring they are to scale) to either myself or [REDACTED] marked clearly for my attention.

Kind Regards

Nicky

Dear Nicola,

Thanks for speaking with me earlier. I also spoke with Team leader Nicola who advised same as you, as expected.

Before I decide to either withdraw or submit plans, my architect has advised me to see if this is the only option to proceed. They tell me I should be able to request an amendment and not have to apply for new planning permission? Is this a possibility or different route?

If not, please advise HOW i submit new plans / to whom?

Please reply asap.

Kind regards,

Dan Lecuyer

Dear Nicola,

Thank you for your email and accompanying letter.

I am afraid i do not understand what you are asking. I filled out the application form online and all sections were ticked as completed. The plans, elevations, floor plans etc you already have had since 2019 and have passed. These are showing against the original planning application.

I have spoke with Amber Willard also and was advised to do what I have done. I do not understand what else you require. The drawings are unchanged. I am simply asking to reduce balcony glass height to 1.3 meters on West side as agreed with neighbours, Amber Willard and Planning / Team leader.

Please please call me [REDACTED] this is becoming a really difficult thing that should be so easy.

Many thanks,

Dan Lecuyer
