Dear Sir

I am enclosing what I hope to be relevant drawings etc with regard to permission for installation of a side gate as shown.

Since moving into this property in January 2012, the front gate access has proved to be very dangerous. There have been several 'near misses' when stepping from the gate onto road ie a distance of 2' - this is despite taking great care when exiting the property.

Your approval of this application would be very much appreciated.

Yours faithfully
