

Planning application to remove and replace the Douglas Fir Tree (? TPO T15)

I am Chairman of the Elm Farm Cottages Association and owner of the common land of the development, I am applying for planning permission. The common land is all within the Rustington conservation area.

Our Tree Surgeon, Townsend Tree and Gardens has recommended the following:

The Douglas Fir tree is not suitable for the location especially as pruning is not recommended and it could grow to twice its height. We recommend felling and replanting with a decorative tree such as a liquid Amber or red Norwegian Maple.

David Johnson
Chairman Elm Farm Cottages Residents Association
