Dear Sir,

Re. Planning Application 8 Flint House replacement of balcony railings.

I appreciate that if current balcony railings really need to be replaced, they have to conform to current building regulations. However, I sincerely hope that a solution may be found to the problem of those in No 8 Flint House which will not destroy the symmetry of the balcony frontage of the whole block of flats. One of the architectural attractions of Cudlows Garden has been the pleasing aspect of the building conformity of all the flats, giving it a very special character. It would be very sad to see this change.

Yours truly,
