

R/153/19/HH

Supporting Statement

The existing boundary around my property when I purchased it in 2014 consisted of walling, fencing and hedging all above 2 metres in height. AS SHOWN ON PHOTO'S MARKED EXISTING.

The walls were falling down and potential hazard to the general public. The hedge was predominantly brambles which were encroaching onto Shaftesbury road.

The fencing adjacent to Shaftesbury road protects my bathroom, my wife's dressing room and downstairs toilet windows from the general public view.

I also need a degree of security around the property.

I apologise in the error made on my behalf of replacing the existing fencing boundary with the same high fencing.

The new proposed fencing will be more traditional fencing and in keeping with the area. *

It will match a lot of properties in Broadmark Lane and the opposite property and the properties at the end of Shaftesbury Road.

Yours sincerely

David Jackson
