Laura

I tried phoning to discuss this but picked up on your voicemail.

We have been working with MJH Homes on the engineering aspects of this scheme but have only just been made aware of responses from your Authority on the drainage aspects. It appears that you were not supplied with the winter ground monitoring results that were undertaken earlier in the year.

So for your information please find attached a copy of the monitoring results undertaken between February and April this year.

Hopefully this information will enable you to discharge the condition with your Planning colleague. relating to drainage

Please contact me should you require anything further.

Regards

Kazys

Hi Steve,

Please see our engineers response below. As you can see the pre commencement condition will be required. If this can't be agreed today then we will need to agree a further extension of time on the application since I am not here tomorrow and the application will not progress in my absence. Shall we say until Tuesday 11th December?

Regards
Anita

Hi Anita,

This is the information I saw previously prior to my original consultation response. Where I stated that infiltration tests must be completed in the winter, at depths less than 2.2m bgl. These tests should be compliant with BRE365.

The condition is still required in my opinion as winter infiltration tests haven't been completed.

Thanks,

Laura Gibbons, MEng, GMICE

Subject: RE: ST MARYS CLOSE 2 DWELLINGS HURST ROAD

Hi Steve,

The reason is my caseload. I have been prioritising applications older than yours and have now got to R/190/18/PL.

Further I have been liaising with our drainage engineer regarding her requested pre commencement condition. As I am sure you are aware from 1 October 2018 section 100ZA(5) provides that planning permission for the development of land may not be granted subject to a pre-commencement condition without the written agreement of the applicant to the terms of the condition (except in the circumstances set out in the Town and Country Planning (Pre-commencement Conditions) Regulations 2018).

In accordance with section 100ZA(5) I would appreciate your written agreement, as soon as possible, preferably today, to the imposition of the following pre-commencement condition :

Development shall not commence, other than works of site survey and investigation, until full details of the proposed surface water drainage scheme have been submitted to and approved in writing by the Local Planning Authority. The design should follow the hierarchy of preference for different types of surface water drainage disposal systems as set out in Approved Document H of the Building Regulations, and the recommendations of the SuDS Manual produced by CIRIA. Winter Percolation testing to BRE 365, or similar approved, will be required to support the design of any infiltration drainage. No building / No part of the extended building shall be occupied until the complete surface water drainage system serving the property has been implemented in accordance with the agreed details and the details so agreed shall be maintained in good working order in perpetuity.

Regards

Anita Gardner
