Subject: Planning Application Reply

Dear Karen,

Thank you for your telephone message and guidance regarding my Planning Application to carry out work on trees within West Preston Manor Grounds (Willowhayne Mews Freehold part). I can confirm as requested, that the trees in question are x3 Weeping Silver Birch (TG33 - Betula Pendula Var as identified within the diagram previously supplied). The diagram was drawn up by the Developer during construction, please note that the trees in question are identified as category B, medium quality and value. We request to prune the trees by removing up to a maximum of 2 meters from the overhang, which is currently almost buried in the grass, also to remove dead wood and thin out as necessary to make them attractive once again.

I trust this further information as requested, now meets your requirements and that our Planning request is granted. The work will be carried out by our Professional Gardener, he awaits your instructions (as last year for another tree which was successfully carried out).

Regards
Eddie Gough
