Dear Andrew,

Further to Carol's comments, please may the following be added:

- The owner(s) of any commercial property (warehouses, offices, etc.) built before 2000 are legally obliged to hold a copy of an asbestos register for each property in their portfolio. As the proposed development is being converted into residential, the Council need to be satisfied that if any asbestos previously identified is still present, it is either removed or suitably managed to minimise risk to human health as there is no safe threshold for asbestos exposure. A copy of the asbestos register and any remedial strategy (where appropriate), must be provided in writing to the Local Planning Authority prior to any works commencing. **Reason:** To protect the amenity of local residents in accordance with Policy QE DM4 of the Adopted Arun Local Plan 2011 – 2031
- STM Environmental's report (ref.: PH1-2019-000050, dated 17th June 2019) should be updated to reflect the historical on-site use of a builder's depot.
- I understand from the contaminated land database that a report submitted as part of planning application ref.: R/282/02 for 68 The Street, Rustington, identified concentrations of lead, zinc and PAH's at shallow depths. The notes indicate that the top 0.5 metres was removed from across the site and a verification report dated October 2004 is held by planning. It would please be very useful to have sight of this report (and any others you

may have, please) and the developer should also be made aware of this information as it may influence the amendments to the existing Phase I report and any subsequent works.

If you have any questions or I haven't explained this very well, please don't hesitate to ask.

Many thanks,

Kate.
