

Thermal efficiency...

It may not seem that a classic style goes hand in hand with thermal efficiency, but it certainly does with Origin.

Designed specifically to meet the demands of the UK market, the Origin Door has been engineered to optimise superior weather rating, security and aesthetic appeal. While each of our doors invite natural light in and remove the barriers between the inside and out, they also work to keep a home warm when it's chilly and cool when it's hot.

Origin exceed British Building Regulation requirements for optimal thermal efficiency as the OB-49 boasts a certified U-Value of 1.2, and on the OB-72, it's 1.3.

The Origin Door also makes use of some of the most sophisticated weathertight seals to ensure the elements stay out.

In real terms, this means your Origin Door will help reduce energy bills and your rooms will become usable all year round.
